FOR EDUCATIONAL PURPOSES

# HOUSEHOLD GOODS PHOTOGRAPHS

Ref. 20508

## CONTENTS:

54 photographs showing HOUSEHOLD OBJECTS that are familiar to the child, classified under various categories:

- Electrical appliances, personal hygiene implements, kitchen utensils, cleaning utensils, furniture, bathroom fittings and other objects.

As well as the groups suggested above, other categories can be created, e.g., places in the home where they are found (kitchen, dining room, bathroom, bedroom, etc.), materials from which they are made, etc.

To make it easier to locate the photos, a list of categories is provided giving the name of the object and its corresponding photo number.

## RECOMMENDED AGES:

From 3 to 8 years.

Up to the age of 3, they encourage young children to talk. From ages 3 to 6 they help children to structure language and acquire a vocabulary and from 6 onwards they make it possible to enrich that vocabulary and assimilate complex linguistic structures.

These photos can be used to teach a second language at oral level. They encourage the acquisition of vocabulary and the learning of complex linguistic structures in a way that is easy for the child and straightforward for the teacher. On the last page of the guide is a vocabulary list of the photo contents in 9 languages, making translation from one language to another easier.

## EDUCATIONAL OBJECTIVES:

Encouraging and enriching language use: These photographs make it easy to learn language naturally. They help to create a stimulating environment that motivates the child to use language in speaking and listening to others in conversations (between teacher-student, parent-child, student-student and in small groups). In this way, comprehension and oral expression are enriched by means of using language in situations that are motivational for the child.

## ACTIVITIES:

### DEVELOPMENT OF LISTENING SKILLS

- Listening to the adult while he/she goes through the photographs and says the name of the object that appears on each one aloud.

### ENRICHING VOCABULARY

- Identifying the object/s shown to him/her by responding to: point to, give me, pick up, show me, etc., that object.
- Showing the student various objects from which he/she should pick out the ones named.
- Saying the name of the objects as they are shown to him/her.
- Expressing the different uses that the objects may be put to: washing, eating, cooking, etc.

### IMPROVING VERBAL COMPREHENSION

- Listening to the description of an object and trying to guess its name.
- Listening to the names of various objects and then saying which part of the home they are usually found in.
- Replying to negative questions by pointing out or saying "it isn't a .... (e.g., a piece of furniture, wood, etc.)"

### CONSTRUCTING SENTENCES

- Repeating simple sentences that describe the object.
- Responding to questions that describe the object: what it's like, what it's made from, where it is usually found in the house.
- Constructing similar sentences based on descriptions: the chair is in the dining room, the frying pan is metal, etc.
- Formulating questions based on descriptions: scissors are for cutting, etc.
- Responding to questions on the child's own experience: if he/she has used the object, when, which object out of a variety does he/she like most or use most, what is one of the objects like in his own home, etc.
- Constructing short sentences that relate or describe 2-3 objects by using demonstratives (this, that, those, etc.).

### LOGICAL REASONING

- Choosing from among various objects the one that is missing to complete a group.
- Picking out from among various objects the one that does not relate to the others.
- Selecting from among various objects those that fulfil particular criteria (colour, shape, etc.)

- Classifying a large group of objects into different categories: furniture, electrical appliances, personal hygiene implements, etc.
- Classifying objects according to the place in the home where they are normally found: bedroom, dining room, lounge, kitchen, bathroom.

#### VISUAL MEMORY

- The child looks at 3, 4, 5 or more objects which are then mixed up with the others and the child has to pick out the original ones.
- The child looks at 3, 4, 5 or more objects laid out in a specific order. They are then mixed up and the child has to put them back in the original order.
- The child looks at 3-7 objects for a few seconds. They are then placed face down and the child points to each object and says its name. They can be turned over to check if he/she was right.

#### AUDITORY MEMORY

- The child listens to the names of 3-5 objects which he/she should then repeat in the same order.

#### LEARNING A SECOND LANGUAGE AT ORAL LEVEL

- All the activities suggested above can be carried out in a second language being learnt by the student.
